Дорогой Сергей.

Спасибо за приглашение участвовать в семинаре по поводу юбилея
А.В.Чернавского.

Но, к сожалению, по состоянию здоровья, я не смогу приехать в Москву.
Поэтому я хочу попросить вас зачитать мое короткое выступление на семинаре.

С уважением, Сергей Матвеев

Дорогой Алексей Викторович, уважаемые участники семинара, уважаемые гости.
От всего сердца хочу поздравить своего УЧИТЕЛЯ с 85-летием.
Будьте здоровы, живите с радостью, работайте с научной молодежью.

Несколько слов о личных воспоминаниях:
Для меня Алексей Викторович оказался прекрасным научным руководителем.
Во-1-х, он не вел за ручку, а давал цель, показывал направление.
Во-2х, с его подачи я начал работать в реферативных журналах, что дало
возможность
оставаться в курсе основных направлениях топологии, когда я уехал в
Челябинск.
В-3х, на примере моей первой статьи он показал мне как надо оформлять
научные работы.

У меня остались самые теплые воспоминания о выездных семинарах в
Подмосковье,
когда Алексей Викторович собирал несколько молодых аспирантов, мы уезжали на
несколько дней на чью-либо дачу. А там занимались топологией.

Самые теплые и сердечные поздравления и добрые пожелания, Алексей
Викторович.

The meeting is open to everyone (except trolls), as are all meetings of
the seminar, so please
feel free to share the program and the abstracts (when they become
available) and call other people
to participate, either online or offline. Also please feel free to
suggest additional speakers.

The choice of the language (English or Russian) is up to the speaker,
but if the abstract is in
English and there is at least one non-Russian-speaking participant
(online or offline), then
the talk must be in English. For offline participants there will be
sandwiches, coffee/tea/chicory
and eventually wine/etc. Videos of the talks will be available at the
seminar webpage in a few days
after the meeting.

If you plan to give a talk, please let me know by Saturday, February 18:
1) the desired duration of your talk (between 20 and 45 minutes for
mathematical talks, between
5 and 30 minutes for historical recollections);
2) whether your talk can be scheduled for any time between 14:00 and
20:00 (Moscow time,
which is GMT+3) on Wednesday, February 22, or only for some proper
subset of these 6 hours;
3) if you plan to speak for 20 minutes or longer, then the title and
abstract of your talk,
or at least some rough idea about its subject.

Assuming that the date of the meeting does not change, the final
deadline for abstracts is on
Monday, February 20 (so that I can send out the announcement of all
talks on Tuesday morning).

It is not clear yet if all requests on duration can be fulfilled (this
depends on the number
of people willing to speak). On February 3 we had another mini-workshop
at our seminar, and
in that case all six speakers spoke for as much time as they requested
(or even a bit longer);
the details can be found in the seminar webpage,
https://www.mathnet.ru/php/conference.phtml?confid=192&option_lang=eng
If there happens to be a shortage of time, preference will be given to
talks that relate to
the work of Alexey Chernavsky and/or include a discussion of his
results, and also to
original research.

If you would like to speak (also) in a regular meeting of the seminar,
please let me know.

All the best,
Sergey Melikhov
